

INTEGRATED MANAGEMENT SYSTEM POLICY

Coastoil Dynamic, S.A de C.V works permanently upon the compliance of quality, security, environment, health safety & sustainable development requirements, thus generating strategies that increase its participation in the energy sector national & internationally. The implementation of the Integrated Management System allows us to manage all our resources in order to meet said requirements in a coordinated way.

Due to this, the top management commits on focusing its management and resources on:

- Complying with all legal, contractual and other applicable requirements regarding the projects we participate in.
- Prioritize, at all moment, the protection of the environment through the prevention of environmental pollution.
- Provide safe and healthy work conditions, to prevent injuries and health deterioration due to working conditions.
- Perform the adequate identification, hierarchy, evaluation, and control of the hazards in order to reduce the risks in security & health at work.
- Establish, implement and maintain the process for query and participation of workers at all levels and applicable functions.
- Maintain a continuous improvement culture of Integrated Management System.
